

THE NEW
TWIN PINES
MANUFACTURING
High Efficiency
Fluid End

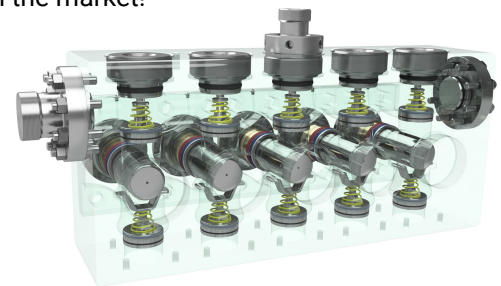

Go with the Flow!

The **NEW FlowMaster Quint High Efficiency Fluid Ends**, developed by **Twin Pines Manufacturing**, are designed to last longer and outperform on flow and pressure, while reducing power-end rod load. TPM's 4 1/2" Quint FlowMaster is capable of moving 1-1/2 barrels per minute more than the typical 4" fluid end on high pressure jobs, increasing production by 26%. Making FlowMaster the most cost effective fluid end on the market!

FlowMaster is both economically and environmentally friendly, enabling fracking companies to use less horsepower on pad, achieving the same amount of work per day with less of a carbon footprint.

FlowMaster is available in a 4", 4 1/2", and 5" size. Same over-all design. Same great performance and reliability.

Pump hard, pump long, pump efficiently, with FlowMaster!
